

Stoma care

By completing this course, you will be able to:

- Identify the different types of stoma, why they are formed and their normal function.
- Recognise stoma abnormalities.
- Discuss the importance of effective communication in stoma care, including cultural and religious considerations.
- Describe the role of the Stoma Care Nurse and the HCA in caring for patients with a stoma.
- Describe care of the stoma patient in the immediate post-operative period.
- Describe the support a patient may need to become independent with stoma care.
- Demonstrate an understanding of the general dietary requirements for the 3 types of stoma.
- Demonstrate an understanding of products used in stoma care.

(We are working in partnership with the Grimsby Institute to support existing staff with development; they offer a wide range of short courses along with Diplomas in Health & Social care.)

Certificate awarded upon completion of induction. T&C's Apply.
